Workspaces UI. Why ?

The screenshot displays the Snowflake Workspaces UI, which is organized into several main sections:

- Left Sidebar:** Contains navigation links for 'Work with data' (Projects, Ingestion, Transformation, AI & ML, Monitoring, Marketplace), 'Horizon Catalog' (Catalog, Data sharing, Governance & security), and 'Manage' (Compute, Admin). The user profile 'Sujith Nair ACCOUNTADMIN' is visible at the bottom.
- Top Panel:** Shows the current workspace 'LEARN_WORKSPACES' and a search bar for files. Below this is a list of files under 'SampleEmployeesData' and 'XatabaseStandards'.
- Database Explorer:** A tree view showing the database structure. The 'HRMS' database is expanded, showing the 'HR' schema with the 'EMPLOYEES' table selected. Other objects like 'VIEW_EMPLOYEES', 'EMPLOYEES_MASK', etc., are also listed.
- SQL Editor:** The central area for writing and executing SQL queries. The current query is a 'create or replace TABLE' statement for 'EMPLOYEES' with various columns and data types.
- Object Details:** A panel on the right showing details for the selected 'HRMS.HR.EMPLOYEES' table. It includes a 'Table' tab and a 'Chart' tab. The table details show 11 rows and a 64ms execution time. Below this is a table listing the columns and their properties.

	name	type	kind	null?
1	EMPLOYEE_ID	NUMBER(6,0)	COLUMN	Y
2	FIRST_NAME	VARCHAR(20)	COLUMN	Y
3	LAST_NAME	VARCHAR(25)	COLUMN	Y
4	EMAIL	VARCHAR(25)	COLUMN	Y
5	PHONE_NUMBER	VARCHAR(20)	COLUMN	Y
6	HIRE_DATE	DATE	COLUMN	Y
7	JOB_ID	VARCHAR(10)	COLUMN	Y
8	SALARY	NUMBER(8,2)	COLUMN	Y
9	COMMISSION_PCT	NUMBER(2,2)	COLUMN	Y
10	MANAGER_ID	NUMBER(6,0)	COLUMN	Y
11	DEPARTMENT_ID	NUMBER(4,0)	COLUMN	Y

Workspaces UI. Why ?

Classic Console

The screenshot displays the Snowflake Classic Console interface. At the top, the navigation bar includes the Snowflake logo and tabs for Databases, Shares, Warehouses, Worksheets (active), History, Partner Connect, Help, and SUCI SYSADMIN. Below the navigation bar, the workspace name 'Hello-World' is shown with a status indicator '20 mins in SF'. The left sidebar contains a 'Find database objects' search bar and a tree view of database objects: DEMO_DB, SF_TUTS (expanded to show INFORMATION_SCHEMA and PUBLIC), SNOWFLAKE_SAMPLE_DATA, and UTIL_DB. The main area features a query editor with a 'Run' button and a 'Context' dropdown. The query text is:

```
1 CREATE OR REPLACE DATABASE sf_tuts;  
2  
3 SELECT CURRENT_DATABASE(), CURRENT_SCHEMA();
```

Below the query editor, the 'Results' tab is active, showing a table with 1 row. The table has columns 'CURRENT_DATABASE()' and 'CURRENT_SCHEMA()'. The row contains the values 'SF_TUTS' and 'PUBLIC'.

Row	CURRENT_DATABASE()	CURRENT_SCHEMA()
1	SF_TUTS	PUBLIC

Workspaces UI. Why ?

Snowsight UI

The screenshot displays the Snowsight UI interface for a Python Worksheet. At the top, the breadcrumb navigation shows 'Worksheets' > 'Titanic_ETL_worksheet'. The top right contains user information 'ACCOUNTADMIN' and workspace 'COMPUTE_WH', along with 'Share', 'Deploy', and 'Run' buttons. Below the header, the worksheet editor shows a code editor on the left with Python code for loading and transforming Titanic dataset data. A yellow callout box with an arrow points to the code editor, labeled 'Python Worksheets'. The right side of the editor has tabs for 'Latest Version', 'Draft', and a search icon. Below the code editor, there are tabs for 'Results', 'PY Output', and 'Chart'. The 'Results' tab is active, showing a table of data. To the right of the table is a 'Query Details' panel showing 'Query duration: 2.0s', 'Rows: 278', and 'Query ID: 01ac799b-0101-9a9d-0...'. The bottom left of the interface has icons for a document, a folder, and a refresh button.

```
1 # The Snowpark package is required for Python Worksheets.
2 # You can add more packages by selecting them using the Packages control and then importing them.
3
4 import snowflake.snowpark as snowpark
5 from snowflake.snowpark.functions import col
6
7 def main(session: snowpark.Session):
8
9     # defining a table name variable
10     tableName = 'Titanic_raw_dataset'
11
12     #loading table data to dataframe using a table or below methods
13     # session.sql("select col1, col2... from tableName")
14     # session.read.options({"field_delimiter": ",", "skip_header": 1}).schema(user_schema).csv("@mystage/testCSV.csv")
15     # session.read.parquet("@stageName/path/to/file")
16     # session.create_dataframe([1,2,3], schema=["col1"])
17     raw_dataframe = session.table(tableName)
18
19     #Result of Print() and Show() function will be displayed in OUTPUT TAB
20     #Finally returned value from the function is displayed in RESULTS TAB
21
22     #Removing Name and Cabin Column to perform some transformation on the data
23     removed_column_data = raw_dataframe.drop(col('Name'), col('Cabin'))
```

	PASSENGERID	PCCLASS	SEX	AGE	PARCH	FARE	TICKET NUMBER
1	892	3	male	34.5	0	7.8292	330911
2	893	3	female	47	0	7	363272
3	894	2	male	62	0	9.6875	240276
4	895	3	male	27	0	8.6625	315154

Query Details

- Query duration: 2.0s
- Rows: 278
- Query ID: 01ac799b-0101-9a9d-0...

Workspaces UI. Why ?

The screenshot displays the Snowflake Workspaces UI with two panels:

- Left Panel (Python Worksheet):** Titled "Titanic_ETL_worksheet", it shows a Python script for loading data from a Parquet file into a Snowflake table. The code includes imports for Snowpark and functions for loading data. The output shows a table with 4 rows of passenger data.
- Right Panel (SQL Worksheet):** Titled "CREATE DDL HRMS.HR", it shows SQL code for creating a database, schema, and table. The code includes commands for creating the database, schema, and table, and for dropping existing tables. The output shows the status of the query execution.

A black arrow points from the text "SQL Worksheets" to the SQL worksheet panel.

	PASSENGERID	PCCLASS	SEX	AGE	PARCH
1	892	3	male	34.5	0
2	893	3	female	47	0
3	894	2	male	62	0
4	895	3	male	27	0

status

	status

Workspaces UI. Why ?

The screenshot displays the Snowflake Workspaces UI. On the left is a sidebar with navigation options: 'Work with data' (Projects, Ingestion, Transformation, AI & ML, Monitoring, Marketplace), 'Horizon Catalog' (Catalog, Data sharing, Governance & security), and 'Manage' (Compute, Admin). The user is logged in as 'Sujith Nair ACCOUNTADMIN'. The main workspace area shows a dropdown menu for 'My Workspace' with options to search, create a new workspace, or import from a Git repository. The SQL editor in the center contains the following code:

```
1 CREATE OR REPLACE DATABASE HRMS;
2
3 CREATE OR REPLACE SCHEMA HR;
4
5 DROP TABLE IF EXISTS EMPLOYEES;
6 DROP TABLE IF EXISTS DEPARTMENTS;
7 DROP TABLE IF EXISTS LOCATIONS;
8 DROP TABLE IF EXISTS COUNTRIES;
9 DROP TABLE IF EXISTS REGIONS;
10 DROP TABLE IF EXISTS JOBS;
11 DROP TABLE IF EXISTS JOB_HISTORY;
12
13
14
15
16 CREATE OR REPLACE TABLE EMPLOYEES
17 (
18     EMPLOYEE_ID NUMBER(6),
19     FIRST_NAME VARCHAR(20),
20     LAST_NAME VARCHAR(25),
21     EMAIL VARCHAR(25),
22     PHONE_NUMBER VARCHAR(20),
23     HIRE_DATE DATE,
24     JOB_ID VARCHAR(10),
25     SALARY NUMBER(8, 2),
26     COMMISSION_PCT NUMBER(2, 2),
27     MANAGER_ID NUMBER(6),
28     DEPARTMENT_ID NUMBER(4)
29 );
30
31
32 CREATE OR REPLACE TABLE DEPARTMENTS
33 (
34     DEPARTMENT_ID NUMBER(4),
35     DEPARTMENT_NAME VARCHAR(30).
```

On the right, the 'Object Details for: HRMS.HR.EMPLOYEES' panel shows a table with 11 rows. The table structure is as follows:

	name	type	kind	null?
1	EMPLOYEE_ID	NUMBER(6,0)	COLUMN	Y
2	FIRST_NAME	VARCHAR(20)	COLUMN	Y
3	LAST_NAME	VARCHAR(25)	COLUMN	Y
4	EMAIL	VARCHAR(25)	COLUMN	Y
5	PHONE_NUMBER	VARCHAR(20)	COLUMN	Y
6	HIRE_DATE	DATE	COLUMN	Y
7	JOB_ID	VARCHAR(10)	COLUMN	Y
8	SALARY	NUMBER(8,2)	COLUMN	Y
9	COMMISSION_PCT	NUMBER(2,2)	COLUMN	Y
10	MANAGER_ID	NUMBER(6,0)	COLUMN	Y
11	DEPARTMENT_ID	NUMBER(4,0)	COLUMN	Y

Workspaces UI. Why ?

The image shows two screenshots of the Snowflake UI. The top screenshot displays the 'My Workspace' dropdown menu, which includes options like 'My Workspace' (selected), 'LEARN_WORKSPACES', 'Snowflake AI', 'YouTube', 'Create Workspace', 'New', and 'From Git repository'. The bottom screenshot displays the 'LEARN_WORKSPACES' dropdown menu, which includes a search bar, an 'Add new' button, and a list of folders and files such as 'SampleEmployeesData', 'XatabaseStandards', 'SnowflakeBestPractices', 'StagingTableNameStandard.txt', 'TableNameStandard.txt', 'TempTableNameStandard.txt', '.env', 'data_update.sql', 'Explore.sql', 'explore_v2.sql', 'markdown-sample.md', and 'update_employee_sal.py'.

The image shows a code editor interface with a file explorer on the left and a code editor on the right. The file explorer shows a project named 'PANDAS_PROJECT' with a red box around it. The project structure includes folders 'data', 'notebooks', and 'output', and files 'data_loader.py', 'main.py', '.env', 'README.md', and 'requirements.txt'. The code editor shows the content of 'main.py', which is a Python script for loading and saving data using pandas and dotenv.

```
1 import os
2 from dotenv import load_dotenv
3 import pandas as pd
4 from scripts.data_loader import load_sample_data
5
6 # Load environment variables
7 load_dotenv()
8
9 def main():
10     data_path = os.getenv("DATA_PATH", "./data")
11     output_path = os.getenv("OUTPUT_PATH", "./output")
12
13     print(f"Data path: {data_path}")
14     print(f"Output path: {output_path}")
15
16     df = load_sample_data()
17     print("Data loaded successfully:")
18     print(df)
19
20     # Save the data to output
21     df.to_csv(os.path.join(output_path, "sample_output.csv"), index=False)
22     print("Data saved successfully!")
23
24 if __name__ == "__main__":
25     main()
26
```

Workspaces UI. Why ?

The image displays two screenshots of the Snowflake Workspaces UI, illustrating the 'Why?' of the new interface.

Top Screenshot: 'My Workspace' View

- Left Sidebar:** Contains navigation links for 'Work with data' (Projects, Ingestion, Transformation, AI & ML) and 'Manage' (Compute, Admin).
- Workspace List:** A dropdown menu showing 'My Workspace' (selected), 'LEARN_WORKSPACES', 'Snowflake AI', and 'YouTube'. Below this are options to 'Create Workspace' (New, From Git repository).
- SQL Editor:** Displays a SQL script for creating a database and schema, and dropping tables. The script is executed against 'ACCOUNTADMIN' on 'COMPUTE_WH (X-Small)'.
- Object Details:** A table showing the details for 'HRMS.HR.EMPLOYEES', including columns like 'EMPLOYEE_ID', 'FIRST_NAME', 'LAST_NAME', 'EMAIL', 'PHONE_NUMBER', 'HIRE_DATE', and 'JOB_ID'.

Bottom Screenshot: 'Database Explorer' View

- Left Sidebar:** Similar to the top screenshot, but with additional links like 'Monitoring' and 'Marketplace' under 'Work with data'.
- File Explorer:** A dropdown menu showing 'SQL File', 'File', 'Folder', 'Upload Files', 'Upload Folder', and 'dbt Project' (with a 'PREVIEW' button).
- Database Explorer:** A table showing the details for 'HRMS.HR.EMPLOYEES', including columns like 'EMPLOYEE_ID', 'FIRST_NAME', 'LAST_NAME', 'EMAIL', 'PHONE_NUMBER', 'HIRE_DATE', 'JOB_ID', 'SALARY', 'COMMISSION_PCT', 'MANAGER_ID', and 'DEPARTMENT_ID'.

Workspaces UI. Why ?

The image shows a composite screenshot of the Snowflake Workspaces UI. In the background, there are two panels. The top panel shows the 'My Workspace' dropdown menu with options: 'My Workspace' (selected), 'LEARN_WORKSPACES', 'Snowflake AI', and 'YouTube'. Below these are 'Create Workspace' options: 'New' and 'From Git repository'. The bottom panel shows the 'LEARN_WORKSPACES' dropdown menu with options: 'LEARN_WORKSPACES' (selected), 'My Workspace', 'Snowflake AI', and 'YouTube'. Below these are 'Create Workspace' options: 'New' and 'From Git repository'. In the foreground, a modal titled 'Create workspace from Git repository' is open. It contains a 'Repository URL' field with the value 'https://', a 'Workspace name' field, and a warning message: 'No API integration found. Please contact your Snowflake administrator to get access to API integrations or create one. Learn more'. At the bottom of the modal are 'Cancel' and 'Create' buttons. The background also shows a SQL editor with a query to create a database and schema, and a table details view for 'HRMS.HR.EMPLOYEES'.

Workspaces UI. Why ?

The image displays the Snowflake Workspaces UI, showing a modal for creating a workspace from a Git repository. The modal is titled "Create workspace from Git repository" and contains the following fields and options:

- Repository URL**: A text input field with the value "https://".
- Workspace name**: A text input field.
- No API integration found**: A warning message stating "Please contact your Snowflake administrator to get access to API integrations or create one." with a link to "Learn more".
- Buttons**: "Cancel" and "Create" buttons at the bottom right.

The background shows the Snowflake interface with the "My Workspace" dropdown menu open, displaying options like "My Workspace", "LEARN_WORKSPACES", "Snowflake AI", and "YouTube". The "Create Workspace" section shows "New" and "From Git repository" options. The "LEARN_WORKSPACES" dropdown menu is also visible, showing the same options. The main content area displays a SQL query for creating a database and schema, and a table details view for "HRMS.HR.EMPLOYEES".

Workspaces UI. Why ?

The image shows two side-by-side screenshots of the Snowflake Workspaces UI, illustrating a change in the results table structure. Both screenshots show the same SQL query: `SELECT * FROM SNOWFLAKE_SAMPLE_DATA.TPCH_SF1.NATION LIMIT 100;`

Left Screenshot (Before Change):

- The results table has 5 columns: `# C_CUSTKEY`, `A C_NAME`, `A C_ADDRESS`, and `# C_NATI`.
- The user interface shows a sidebar with navigation options like 'Work with data', 'Projects', 'Ingestion', 'Transformation', 'AI & ML', 'Monitoring', 'Marketplace', 'Horizon Catalog', 'Catalog', 'Data sharing', 'Governance & security', 'Manage', 'Compute', and 'Admin'.
- The user is identified as 'Sujith Nair ACCOUNTADMIN'.

Right Screenshot (After Change):

- The results table now has 6 columns: `# C_CUSTKEY`, `A C_NAME`, `A C_ADDRESS`, `# C_NATIONKEY`, and `A C_PHONE`.
- The user interface is slightly different, with a 'Choose database' dropdown visible.

Results Table Data (Left Screenshot):

	# C_CUSTKEY	A C_NAME	A C_ADDRESS	# C_NATI
1	60001	Customer#000060001	9li4zQn9cX	
2	60002	Customer#000060002	ThGBMjDwKzkoOx

Workspaces UI. Why ?

The screenshot displays the Snowflake Workspaces user interface. On the left is a sidebar with navigation options: 'Work with data' (Projects, Ingestion, Transformation, AI & ML, Monitoring, Marketplace), 'Horizon Catalog' (Catalog, Data sharing, Governance & security), and 'Manage' (Compute, Admin). The main area is titled 'Explore.sql' and shows a SQL query editor with three queries. An arrow points to the 'Snowflake AI Copilot' prompt: 'Write me a query that...'. Below the editor, the 'Results' tab is active, showing a table with 10 rows. The table columns are: C_CUSTKEY, C_NAME, C_ADDRESS, C_NATIONKEY, C_PHONE, C_ACCTBAL, C_MKTSEGMENT, and C_COMMENT. The user's name 'Sujith Nair' and role 'ACCOUNTADMIN' are visible in the bottom left.

SQL Editor Content:

```
1
2
3
4 SELECT *
5 FROM SNOWFLAKE_SAMPLE_DATA.TPCH_SF1.CUSTOMER LIMIT 10;
6
7
8 SELECT * FROM SNOWFLAKE_SAMPLE_DATA.TPCH_SF1.ORDERS LIMIT 10
9
10 SELECT * FROM SNOWFLAKE_SAMPLE_DATA.TPCH_SF1.NATION LIMIT 100;
```

Query Results (Table View):

	# C_CUSTKEY	A C_NAME	A C_ADDRESS	# C_NATIONKEY	A C_PHONE	# C_ACCTBAL	A C_MKTSEGMENT	A C_COMMENT
1	60001	Customer#000060001	9li4zQn9cX	14	24-678-784-9652	9957.56	HOUSEHOLD	I theodolites boost slyly at the platelets: permaner

8	60008	Customer#000060008	3VteHZYOfbgQioA	2	12-693-562-7122	5621.44	AUTOMOBILE	nal courts. carefully regular Tiresias lose quickly ur

Workspaces UI. Why ?

The screenshot displays the Snowflake Workspaces interface. On the left, a sidebar contains navigation options: 'Work with data' (Projects, Ingestion, Transformation), 'AI & ML' (highlighted), 'Monitoring', 'Marketplace', 'Horizon Catalog', 'Catalog', 'Data sharing', 'Governance & security', 'Manage' (Compute, Admin), and a user profile for 'Sujith Nair ACCOUNTADMIN'. The 'AI & ML' menu is open, showing options: Studio, Cortex Analyst, Cortex Search, Features, Models, Evaluations, Document AI, Agents, and Snowflake Intelligence. The main workspace shows a SQL editor with the following code:

```
1  
2  
3 SELECT *  
4 FROM SNOWFLAKE_SAMPLE_DATA.TPCH_SF1.CUSTOMER LIMIT 10;  
5  
6  
7 SELECT * FROM SNOWFLAKE_SAMPLE_DATA.TPCH_SF1.ORDERS LIMIT 10
